English - Upper-intermediate (B2), Native Russian and Belarusian speaker.

Education

IT-courses "Rolling Scopes School"

Harvard University «CS50's introduction to Computer Science»

IT-courses "Adukar"

Minsk Innovation University «Psychology»

Belarusian State University «Biology»

Lyceum of Belarusian State University «Chemical/Biological»

Objectives

I want to continue my career as a Front-end web developer at creative company to become a part of the development team and advance to Senior Full-stack with the opportunity to become a Team Lead in the future. I'm always evolving and adding new programming languages, frameworks, and tools to my tech stack. Open for any activities, meetings, meetups and work experiments.

Work experience

HIGHLIFE Ltd. - CEO   www.fmx.by

At that time it was a great conception to start a new business from our hobbies. At this site, you can see most of my ideas and solutions, design conception, logo drawing, photo processing. I have written most of the articles and descriptions, news. We were made events and worked with the media (We were the first in Belarus who organized the largest musician and sports festival at the Airport Minsk-1 - "Inspiration by speed 1-2"). Eventually opened a store, where I worked with suppliers. I was working with CMS Joomla, where I connected modules and fixed bugs in code. At that time I just started to dive into the javascript world. Currently, we are suspending activities, but work on the project will continue soon...
In recent years, I studied at the Rolling Scopes School and Harvard CS50's courses, worked as a freelancer on different projects.

About me

I'm always loved to create complicated things with many details. I'm having graphic design skills and an understanding of digital aesthetics. I love programming, and of course, love design. Persevering and multitasking, with analytical thinking and an engineering mindset. I have a critical reflection on my past mistakes and can self-taught from them. I like to educate myself, open to cutting-edge technologies and challenges. I can easily go through training under the supervision of an experienced mentor and show a quality result, write complex clean code and maintain it. Perfect team player with a versatile personality and a sense of humor. I have an excellent set of soft skills that will be useful in a team.

With sincere thanks   Anton Vasiluyk
